than this value. Further in-depth studies will be necessary for discussing possible runouts.

ACKNOWLEDGEMENT: The authors have jointly conducted this field survey with the team of lifeline earthquake engineering experts of the American Society of Civil Engineers (ASCE) led by Mr. John Eidinger and Mr. Alex Tang. The authors are indebted to Mr. Masataka Shiga, PhD candidate at the University of Tokyo, who have joined the field survey and helped the authors flying a UAV to collect 3D images of terrains. The authors would like to express their sincere thanks to Dr. Yukihiro Tsukada, Executive Director of the Japan Society of Civil Engineers (JSCE hereafter), Dr. Takanobu Suzuki, Chairman, Dr. Yoshihisa Maruyama, Secretary General and all members of the Subcommittee of Lifeline Earthquake Engineering, JSCE Committee of Earthquake Engineering, Mr. Satoshi Suenaga, Kubota Corp., and Mr. Jiro Nakamura, Chubu Electric Power Co., Inc., for their generous supports to this joint survey. The authors' field survey was partially supported by the Grant-in-Aid for Scientific Research (A), No. 16H02744.
