

# Steel Nexus

A Place for "Weaving Communication" to Build the Future of Steel Structures.

## Call for Participants

We will establish a collaborative network for doctoral students to construct the 'SWING Pathway' – a roadmap for next-generation education and research built upon the core pillars of Sustainability, Weaving Communication, and Innovation.

We support you in your challenges in building a resilient society by providing opportunities for exchanging research information, consulting on study abroad programs, and engaging in internships and networking with professional engineers.

### [ Activity description ]

#### Research Exchange

(Research Information Exchange Meetings / Progress Report Meetings)

Casual research presentations and exchanges of opinions among doctoral students across different disciplines.

#### Career Support

(Internship Opportunities)

Providing opportunities for corporate research and practical work experience exclusively for network participants.

#### Technical Exchange

(Exchange Meetings with Young Engineers & Researchers)

Discussions with young engineers active in the industry to deepen understanding of practical work.

#### Information Distribution

Distributing the latest information on events and job openings from the JSCE Committee on Steel Structures.

### Eligibility

Students currently enrolled in a doctoral program whose research theme is in the field of steel structures.

### Participation Fee

**Free**

### How to Register

Please register by filling out the necessary information in the Google Form below.

Organizer: Committee on Steel Structures, Japan Society of Civil Engineers (JSCE)
