

Announcement of the Summer Special Program on the Management of the Civil Structures in 2018

Organized by

The task committee of the international education for structural engineering
The committee of the structural engineering in Japan Society of Civil Engineers

Scope

This summer special program provides lectures for international students and engineers including Japanese to learn and discuss the maintenance of the civil structures in English. The program is conducted by widely-recognized professors in the management and the maintenance engineering field. The International students and engineers are strongly encouraged to participate in this program.

Target

/ Graduate students who are interested in the bridge maintenances
/ Engineers who maintain the bridges
